

GOLDENLUCK METAL GROUP LTD.

Premium metal accessories and custom
hardware manufacturing

COMPANY PROFILE 2026

Global manufacturing partner

A focused metal manufacturer serving fashion, packaging and custom hardware

1989

Founded

50,000+

sqm self-built factory

800+

skilled employees

50

R&D professionals

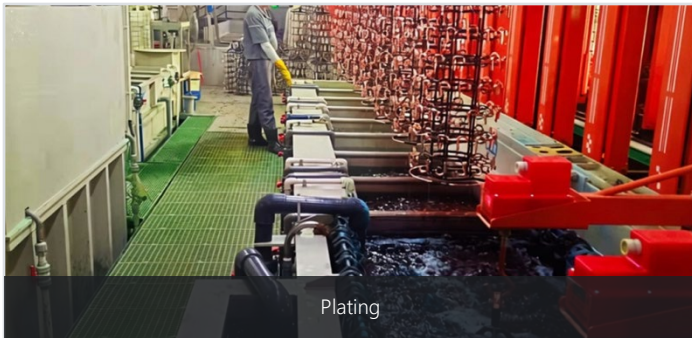

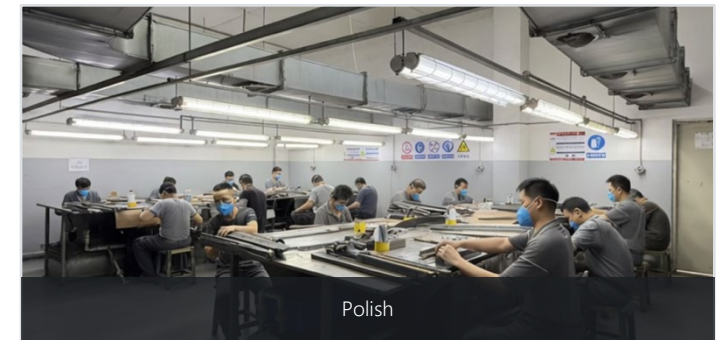

Self-built campus, in-house engineering and controlled production support demanding brand customers.

In-house capabilities

Self-owned tooling and electroplating are core advantages among metal hardware suppliers.

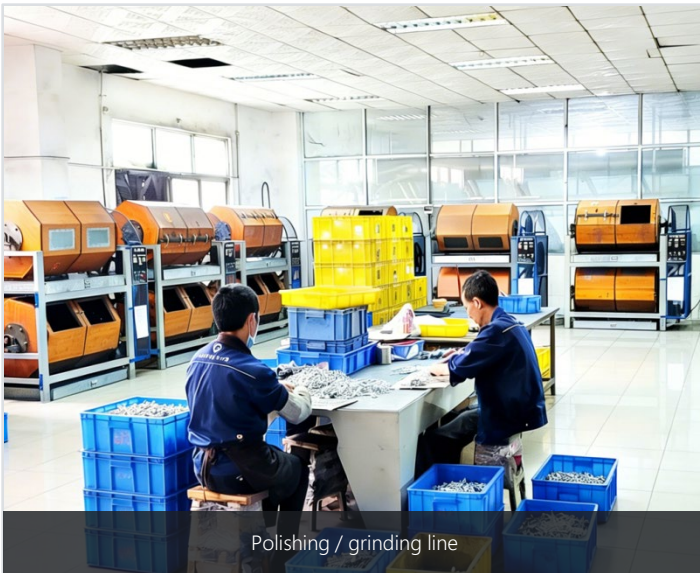

Tooling, electroplating, assembly and QC are kept in-house for faster sampling, controlled finish development and traceable quality.

Manufacturing capacity

Equipment layout and process control support stable delivery for customized orders.

Polishing / grinding line

Polish workshop

Polish processes support premium metal finishes.

Automated production line

Process discipline

Automated lines support repeatability from sample to mass production.

Die-casting machines

30 Die-casting machines

Capacity for metal accessories, packaging components and custom hardware.

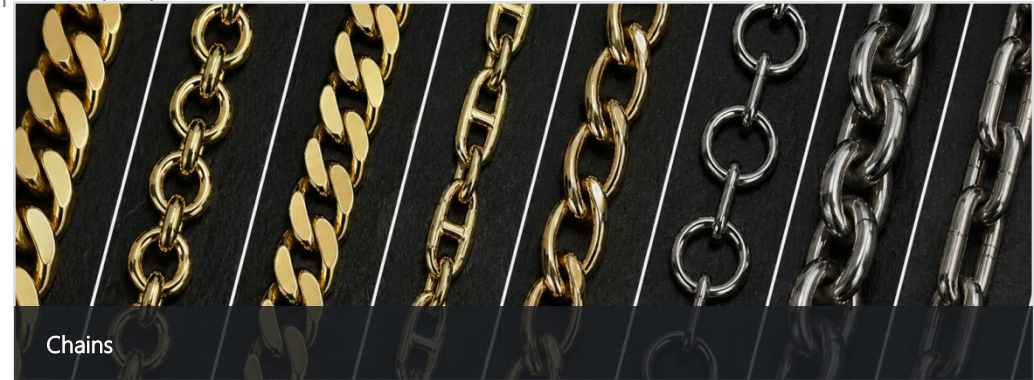

Product portfolio

Representative categories from bag hardware, chains, charms and premium packaging metal.

Bag hardware

Chains

Charms

Premium packaging metal

Product

Custom metal components across caps, automotive, electronics and brass craft applications.

Industries served

Application categories are shown separately from our customization capability.

Fashion accessories

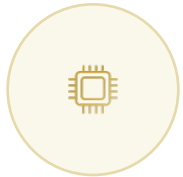

Bottle caps & closures

Packaging solutions

Automotive components

Electronics components

Decorative crafts

Chains & hardware

Gifts & promotional items

Custom manufacturing solution

Design, tooling, sampling, color development and mass production.

50-person R&D team

Structure, appearance and production feasibility support.

Own Plating factory

Custom color development and electroplating control.

Quality control at every checkpoint

Dedicated QC teams conduct online, post-plating and final AQL inspection before shipment.

Traceable quality records

Production testing and inspection results support consistent delivery and customer review.

Digital production & AI traceability

Production, testing and inspection records can be traced across the full workflow

Digital production data

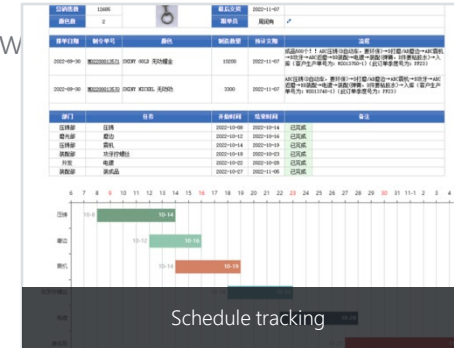

Production status, process data and order progress are managed internally.

Full-process traceability

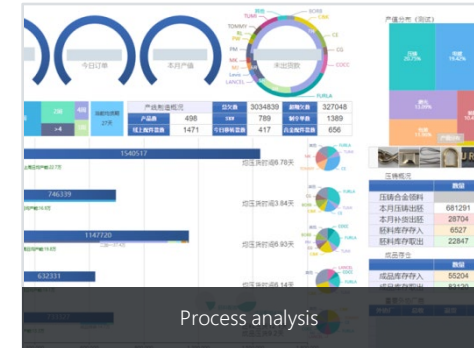

Production, testing and inspection records are connected for review.

AI-assisted analysis

AI-enabled data analysis supports planning, quality monitoring and exception tracking.

Schedule tracking

Process analysis

Electronic labelling

A more transparent workflow for complex customized orders.

Certifications & compliance

Audit documents for procurement and brand review.
